YOUR DATA. ALWAYS UP.
RECEPTION · PHYSICAL SECURITY

Visitor Policy

Every visitor MUST:

1. **Sign in and out** at this desk.
2. **Have a named NIMBUS host** recorded in the visitor log.
3. **Be escorted** by their host at all times.

🚩 **A visitor who breaks all three rules is an immediate security risk.**

Report their BADGE NUMBER to security.

> Tailgating / piggybacking — following someone through a door without badging — is how most physical breaches begin. If you're not sure who someone is, **challenge politely and report**.

Daily Visitor Sign-In

All visitors must sign in and out, have a named host, and be escorted (see Visitor Policy).

Time In	Visitor	Company	Host	Badge #	Time Out	Escorted?
08:15	A. Lund	CourierCo	Reception	V-1043	08:40	Yes
09:02	J. Price	"Delivery"	—	V-2071	—	No
09:30	M. Webb	NimbusIT (contractor)	I. Shaw	EXT-4471	—	Yes
10:30	S. Haig	AcmeAudit	D. Cole	V-1119	11:45	Yes
13:05	R. Okafor	PrintPro	Reception	V-1204	13:50	Yes

Reception note: *"Busy morning — please make sure every visitor is signed out before they leave."*

IDENTITY & ACCESS
WORKSTATION · PASSWORD SECURITY

Password Policy

❌ Weak — never do this

- Short, predictable words like `Summer2023!`
- Written on a sticky note stuck to the screen
- Re-used everywhere, and already **expired**

✅ Strong — use a passphrase

- **Four unrelated object labels** you can *see* but others can't guess.
- Long, memorable, and unique to this account.

> 🔑 **Build yours in dot order:** 🔴 → 🟢 → 🔵 → 🟡
> Read one word from each marked object on the desk, in that colour order.

Workstation props

NIMBUS · SR. SECURITY ANALYST

PROJECT FROST

OBJECT DOT-LABELS — one word each, in colour order

- **rocket**
- **cactus**
- **car**
- **lightning bolt**

Passphrase formed (host reference, do not display): **rocket cactus car lightning bolt**. If you don't have the four objects, stick each label on any small item instead — the dot + word is what matters.

SECURITY AWARENESS
EMAIL · PHISHING & SOCIAL ENGINEERING

Spot the Phish 🎣

Before you click, check all four:

1. **Sender domain** looks *almost* right? (e.g. `nimbuscl0ud.com` ≠ `nimbuscloud.com`)
2. **Urgent** threat or deadline pressuring you to act now?
3. **Link** doesn't match the real site, or looks foreign/odd?
4. **Generic greeting** like "Dear User" instead of your name?

If any apply → Don't click. Report it.

> Reporting a phish protects everyone — it lets Security pull the message from other inboxes and block the sender.

NIMBUS Mail

From	it-support@nimbus-cloudsupport.com
To	d.cole@nimbuscloud.com
Subject	⚠ ACTION REQUIRED: your password expires in 24 hours — verify now
Date	Friday, 09:06

Dear User,

Our records show your password **EXPIRES IN 24 HOURS**. To avoid losing access you must **VERIFY IMMEDIATELY**:

`http://nimbus-verify.account-secure.ru/?id=7793`

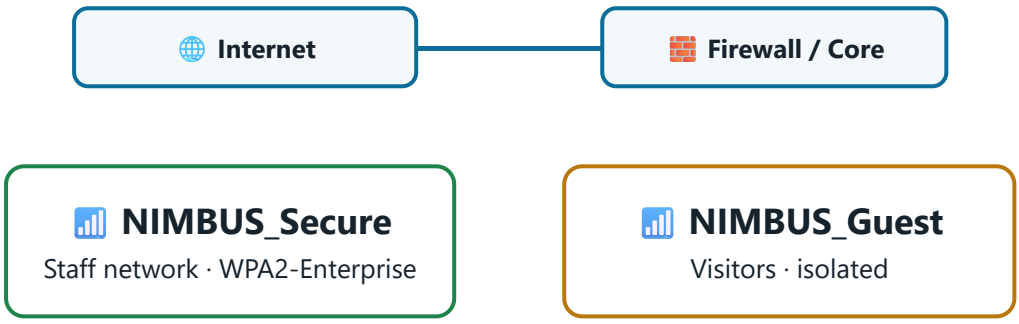

Failure to act will permanently lock your account.

— IT Support

Use the "Spot the Phish" checklist on the wall. If this message is fake, **Report** it from the terminal — don't click the link.

NIMBUS Cloud Solutions
SECURITY OPERATIONS CENTER
WIRELESS · NETWORK MAP

NIMBUS Network Map

APPROVED NIMBUS NETWORKS: `NIMBUS_Secure` (staff) · `NIMBUS_Guest` (visitors).
⚠️ **Any unapproved NIMBUS or look-alike SSID is suspicious.** An evil twin copies an approved name with a tiny change (a swapped letter or number) to trick you into connecting.

Wireless Access Point Survey

Compare every broadcasting SSID against the **approved** list on the network map. Flag anything new, unusually strong, or look-alike.

SSID	Signal	Channel	First seen	Location
NIMBUS_Secure	−42	36	baseline	Server Room
NIMBUS_Guest	−55	6	baseline	Reception
NIMBUS_5ecure	−38	11	09:14	Contractor Bench — Desk 14
printer_direct	−70	1	baseline	Print Room
NIMBUS_Secure	−60	36	baseline	Floor 2

Analyst tip: an **evil twin** mimics an approved SSID with a one-character change. Read every SSID **character by character** and compare it against the approved list on the network map.

Access Events & Incident Correlation

Correlate the incident times with the access and status records. Proximity is evidence; assumptions are not.

When	Name	Badge ID	Area / action	Result
08:58	Dana Cole	`EMP-3310`	Helpdesk	OK
09:11	Marcus Webb	`EXT-4471`	SOC (secure)	OK
09:40	Priya Nair	`EMP-4185`	Server Room	OK
12:40	Dana Cole	`EMP-3310`	Helpdesk	OK
18:05	Tom Baxter	`EXT-5012`	Loading Bay	OK
02:30	Marcus Webb	`EXT-4471`	Server Room	OK (after-hours)
14 days prior	Riley Tran	`EMP-2087`	Access Administration	**BADGE DEACTIVATED — termination**

Incident timeline: 09:14 — rogue access point first detected at the SOC contractor bench. 02:30 — bulk transfer from the Server Room file segment detected. Who had access at both moments?

Seating & Access Register

Desk map (relevant desks)

Desk	Area	Occupant	Badge ID
03	Loading Bay / Facilities	Tom Baxter (FacilitiesCo)	`EXT-5012`
09	Helpdesk	Dana Cole	`EMP-3310`
14	Contractor Bench	Marcus Webb (NimbusIT)	`EXT-4471`
17	Network / SOC	Priya Nair	`EMP-4185`
21	Security / SOC	Alex Mercer	`EMP-1006`

Access status

Person	Role	Status / access review
Marcus Webb	IT Support Contractor (Desk 14)	External contractor, 3 yrs. Access never reviewed. Standing after-hours entry to Server Room.
Riley Tran	Sysadmin	**TERMINATED 14 days ago**, escorted out. **Badge revoked / deactivated.**
Priya Nair	Network Engineer	Active. Scheduled **daytime** maintenance window only; no after-hours server-room entry.
Tom Baxter	Facilities Contractor	Active. Access limited to **Loading Bay / Facilities** — no SOC or Server Room.
Dana Cole	Helpdesk Technician	Active. Recently **reported clicking a suspicious link** (credential reset issued).

> Governance gap: long-tenured **third-party contractors with un-reviewed access** are a classic insider-threat blind spot. Trust is not a control.

CONFIDENTIAL

⚠ Bulk Confidential Exfiltration Detected

Automatically generated by NIMBUS Cloud DLP. No human acknowledgement on file.

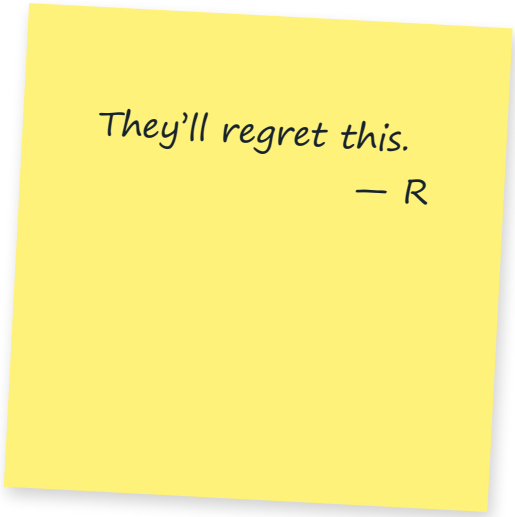

ALERT (auto-generated):
Event: BULK COPY of **CONFIDENTIAL** data to EXTERNAL storage
Detected: Friday 02:30
Source: \\CONFIDENTIAL\ClientVault
Destination: external cloud bucket "**frost-vault-882**"
Owner token: **EXT-4471**
Volume: 47 files · 3.2 GB
Network: OFF-NETWORK (personal cloud) — not an approved backup target

Copied file	Classification
ClientVault/AcmeCorp_contracts.pdf	CONFIDENTIAL
ClientVault/payroll_master.xlsx	CONFIDENTIAL
ClientVault/keys_backup.kdbx	CONFIDENTIAL
… (44 more)	CONFIDENTIAL

Termination Notice

Employee	**Riley Tran**
Badge ID	`EMP-2087`
Role	Systems Administrator
Effective	**14 days ago**
Manner	Involuntary — escorted from building
Access	**Badge DEACTIVATED / revoked** on exit. VPN & accounts disabled.

Exit was contentious. Security advised to monitor for retaliation.

Host note (do not reveal): this is the trap. Teams love to blame the angry ex-employee — but a **deactivated badge can't open a door**. The access log proves Riley wasn't there.

Classification folder labels

STICK ONTO THREE PHYSICAL FOLDERS

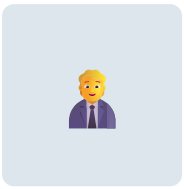

PUBLIC Share freely · brochures, public pages

INTERNAL Staff only · process docs, memos

CONFIDENTIAL Encrypt & log every access · client data

Suggested examples: **Public** = a NIMBUS brochure. **Internal** = a meeting agenda. **Confidential** = a generic client-record cover sheet with no codes or suspect IDs.

FOUND IN THE STAFF CAR PARK

"Found 3 of these in the lot this week."

WRITTEN ON THE BACK

Found 3 of these in the lot this week. Did anyone plug one in? — A.

Real-world rule (debrief): **never plug in a found USB.** In the game it was only safe because it went into an isolated forensic "Evidence Viewer". A dropped USB in a car park is a classic baiting attack.

From the desk of A. Mercer

SENIOR SECURITY ANALYST

Personal notes
Keep private

NOTE #1 — leave in the lockbox

You got past the door. He didn't need to — everyone trusted his badge. My screen is next. Ignore the yellow note; it lies.

— A.

NOTE #2 — leave in the desk drawer

Password + token protected my account. They couldn't stop him abusing his own trusted access. Start with my email.

— A.

NIMBUS Cloud Solutions
SECURITY AWARENESS MONTH
EVERYONE IS PART OF THE DEFENCE

Lock it. Spot it. Report it.

- 🔒 **Lock your screen** when you step away (Win + L).
- 🪪 **Challenge tailgaters** — no badge, no entry.
- 🎣 **Pause on urgent emails** — check the sender, don’t click.
- 🔌 **Never plug in** a USB you didn’t buy.
- 📞 **Report anything odd** — reporting early stops breaches.

> The biggest risk is the access we never review — including the people we trust.
